

❖ Trading Account Management on Otet's Platforms

To manage your accounts on the Otet Markets dashboard, simply follow these steps:

1. After logging into your account, select "Platforms" from the left-hand menu. Then, click on either MT5 or cTrader depending on the account you want to manage.

2. At the top left of the first page of the platforms (MetaTrader or cTrader), you'll find three options: Demo, Live, and All. These options allow you to customize how your trading accounts are displayed. For example, if you only want to see your real trades, click on "Live" to display only live accounts. Conversely, to view only demo accounts, click on "Demo".

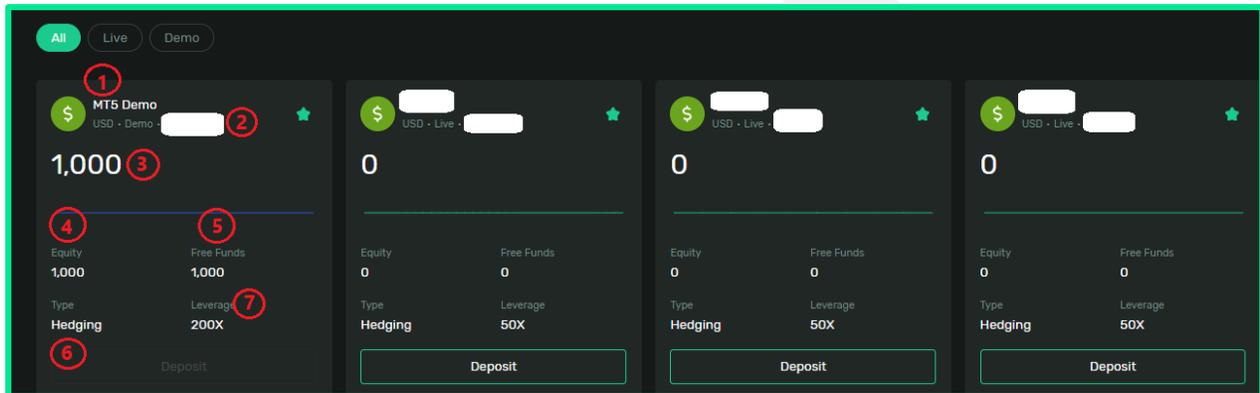

3. On this page, the dashboard displays all trading accounts (Live/Demo) in separate boxes. Each box contains the following account details:

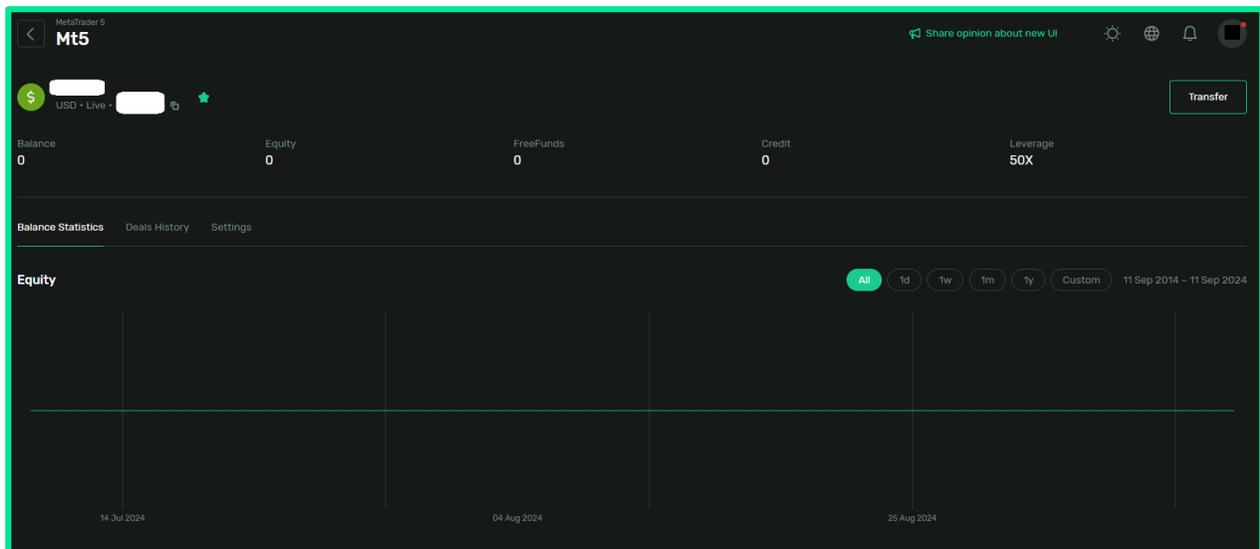

- (1) Account number
- (2) Account type (Live/Demo)
- (3) Account balance
- (4) Account equity
- (5) Free funds

(6) Type

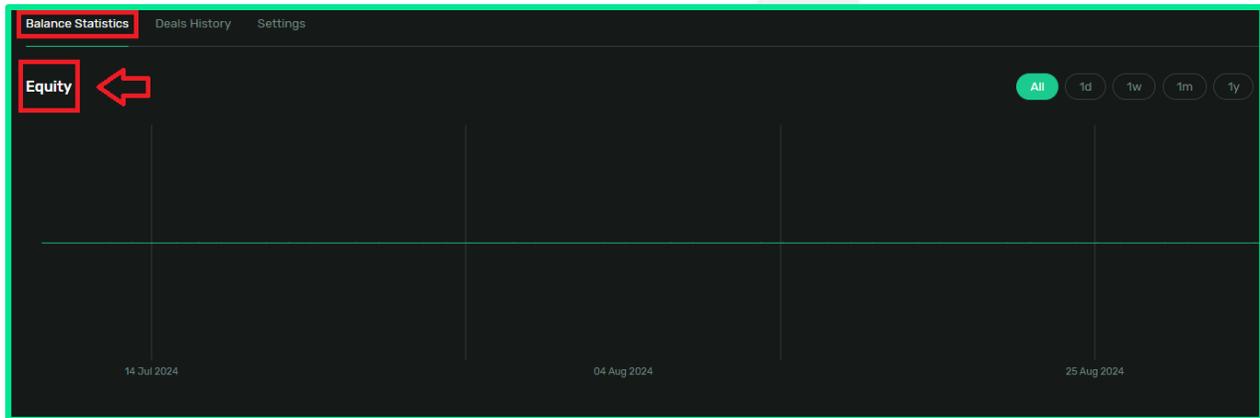

(7) Leverage

4. By clicking on the desired trading account, you can access its dedicated page where account details and transaction history are displayed.

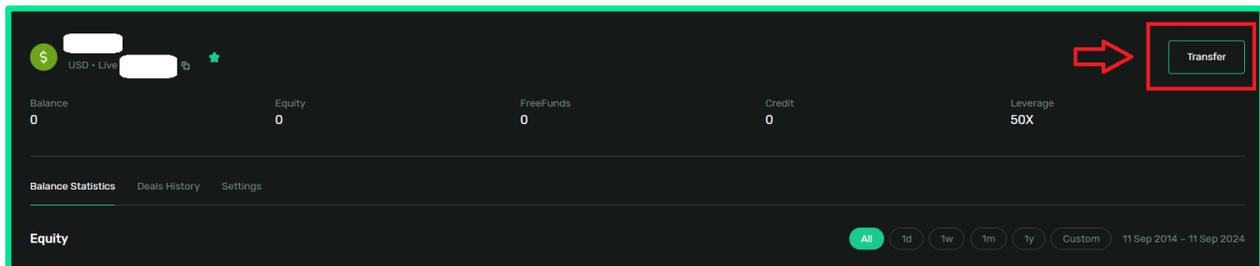

5. In the middle of the page, on the left side, you'll find three sections: Balance Statistics, Deals History, and Settings. By clicking on "Balance Statistics," you can view your account equity.

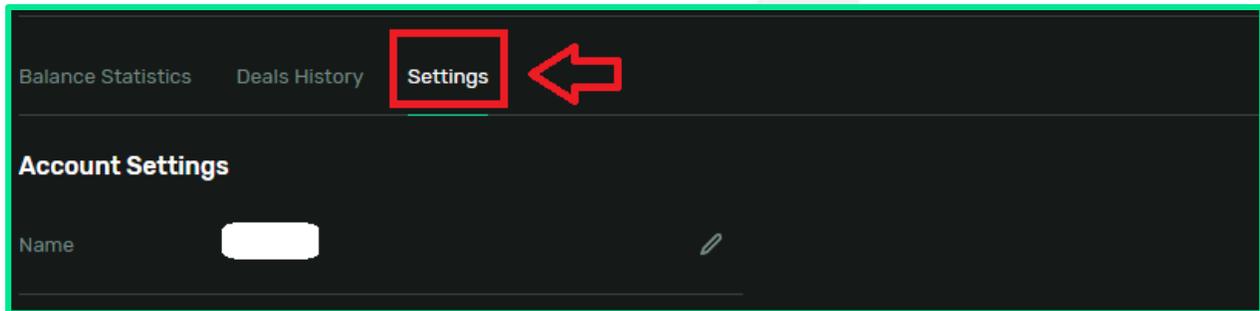

You can view your account history in the section.

6. By clicking on "Transfer," you will be redirected to the funds transfer page where you can exchange funds between your trading accounts within Otet.

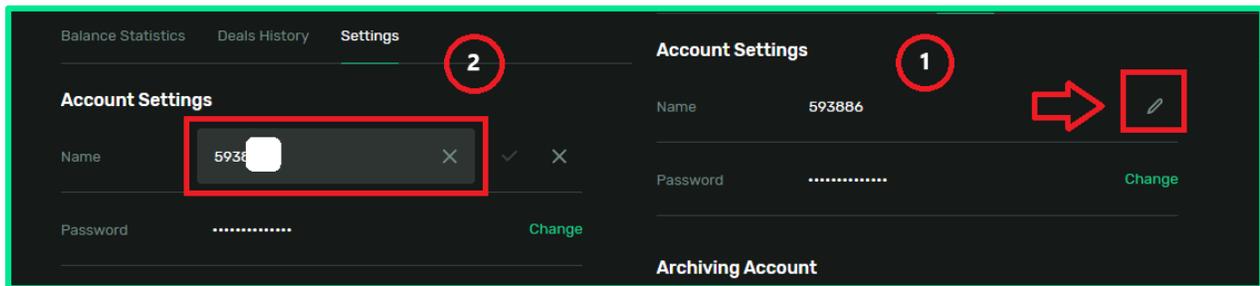

Note: We recommend that you use the trading platform you used to execute your trades (cTrader or MetaTrader) to view a complete report of your transactions. These platforms offer more features and access.

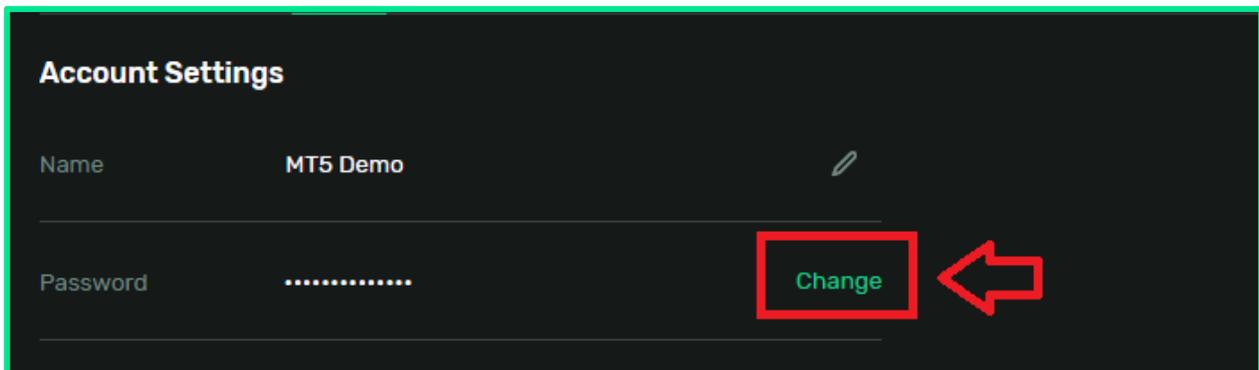

7. By clicking on "Settings," a page will open where you can change the account name and password you have set. You can also archive your accounts, which we will explain further below.

7-1- To change the account name, simply click on the pencil icon next to the account name. This will allow you to easily edit the name and then click the checkmark to save your changes.

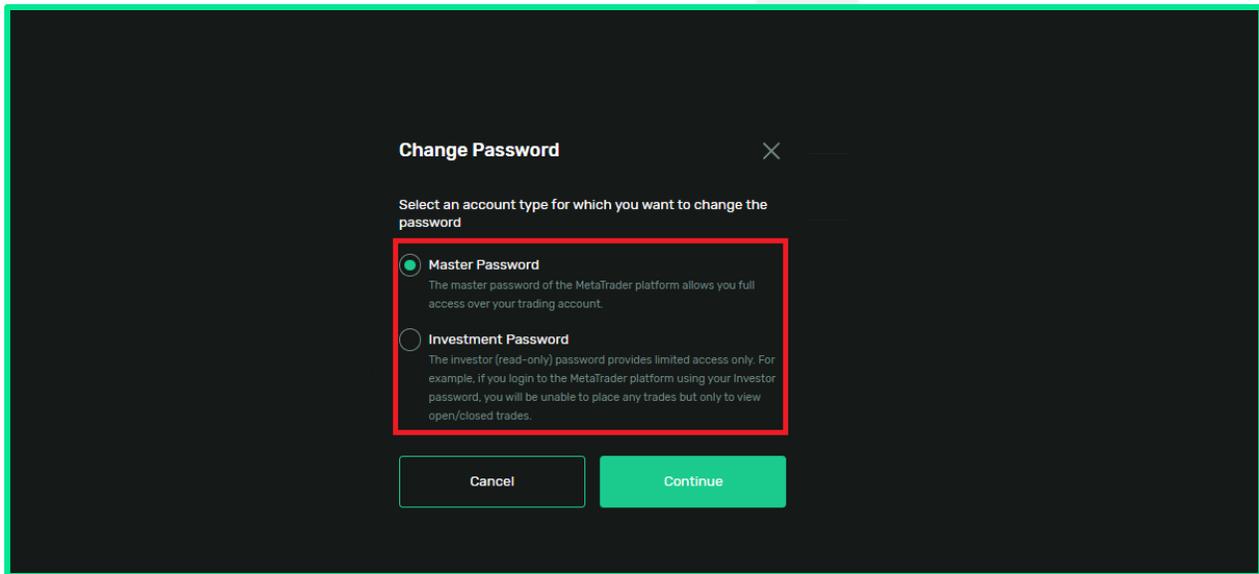

7-2- By clicking on the settings icon, a page will open where you can change the account name and password you have set. To change your password, select "Change".

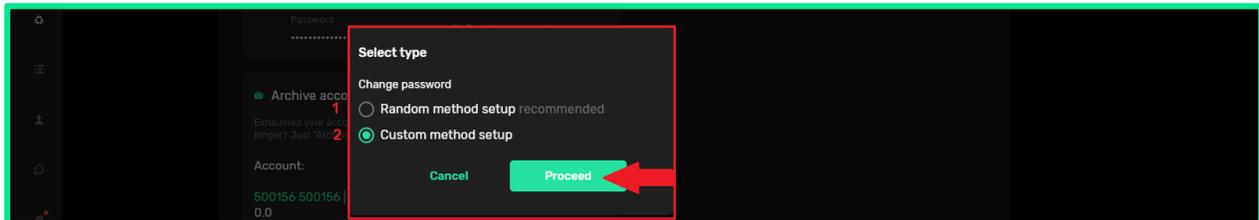

7-3- At this point, a new window will pop up asking you which password you want to change:

- (1) Change Master Password
- (2) Change Investor Password

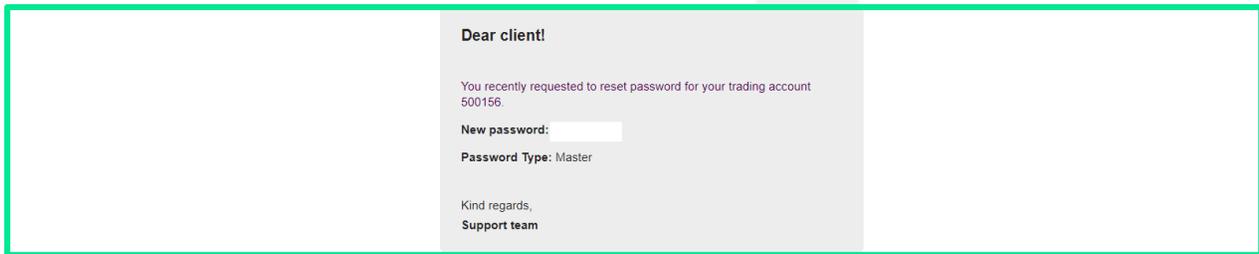

7-4- If you click on "Master account," a new window will open, asking you to choose a method for changing your password:

- (1) Automatic password change (Random method setup)
- (2) Manual password change (Custom method setup)

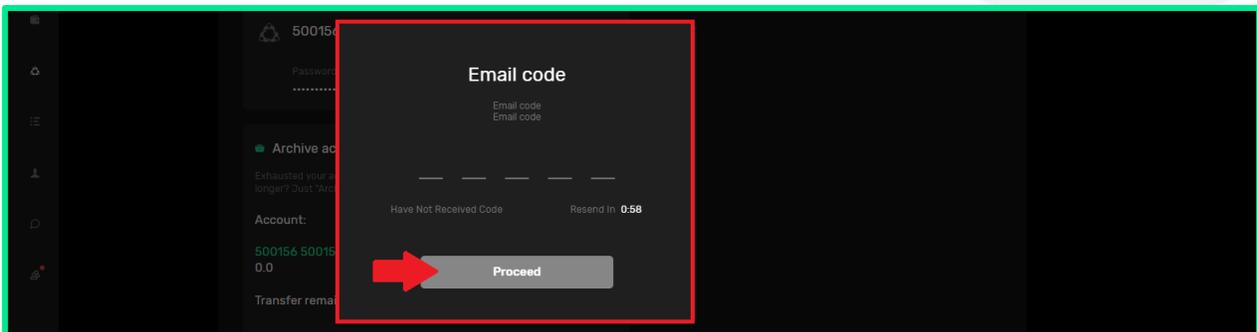

***Note:** If you click on "Investment account," you'll need to follow the exact same steps that we'll describe below.

7-5- If you click on "Random method setup," the system will automatically generate a password and send it to your email.

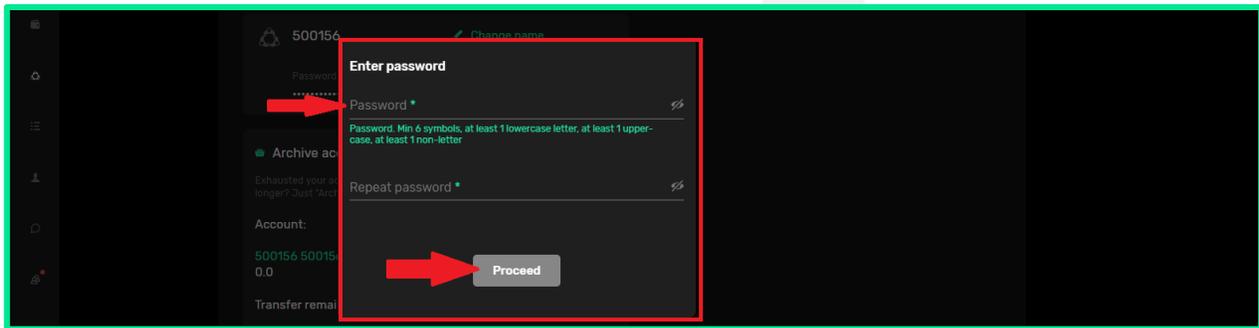

7-6- If you click on "Custom method setup," a window will open asking for a verification code. This code will be sent to your email address.

7-7- In the email you receive, you'll find a code and a "Change" button. You can either click the button or manually enter the code into the box in the window above to open the password change window. In this window (see image above), enter your new password and then click "Proceed."

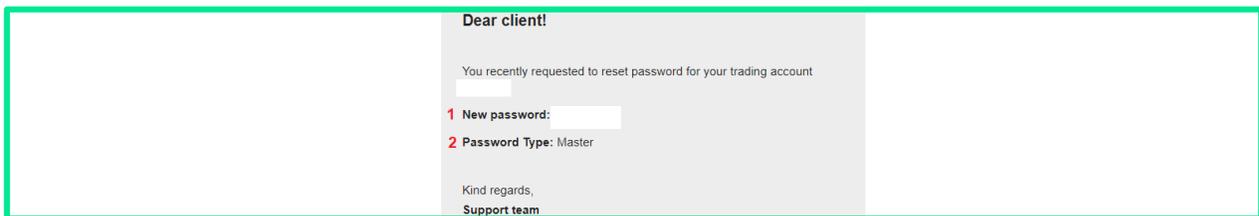

7-8- At this point, a window will pop up where you can set a new password and click "Proceed."

***Note:** Your password must be at least 6 characters long and include at least one uppercase letter, one lowercase letter, one number, and one special character.

7-9- After setting a new password, you'll receive an email confirming the new password and its type. You can refer to this email in the future if you forget your password again.

Otet Markets' brokerage support unit is ready to assist our valued customers 24/7. If you encounter any challenges or require further information, you can connect with our experts through the online chat available at the bottom of our pages.

“Thank you for entrusting your trades to our brokerage firm”
